

Your home on the map

i We ask this question to help us work out environmental conditions as accurately as possible, since two buildings with the same postcode could be on different streets, with different levels of traffic, noise, and so on.

Please be assured that your information is confidential and secure (click 'Help & information', above right, to find out more).

Many thanks for providing your postcode. Based on this, the satellite map below should show the neighbourhood around your home.

Please click and drag to move the map so that your home is in the centre, inside the yellow box.

How did you get on?

- ☐ My home is in the yellow box
- ☐ My home is in or near the yellow box—it could be one or two buildings either way
- ☐ I couldn't find my home on the map
- ☐ The map didn't load/didn't work
- ☐ I prefer not to say exactly where I live
